

Data Sheet

ADOSOLVE

Degreasing Fluid

Description

ADOSOLVE is a non-caustic powerful solvent emulsion designed to remove oil, grease, wax, bitumen and other materials from a variety of surfaces. It can be used on concrete, stone, wood, steel, terrazzo and many other surfaces. It can be diluted with water or spirit based material.

Advantages

- Easy to apply by applicator or spray
- Quickly breaks down and removes contaminants
- Excellent penetration properties
- Easily removed by flushing with water.
- Contains bacteriocidal additive
- Inexpensive square metre coverage

Application

Roll or shake drum prior to use.

Absorbent Surfaces

Brush well into surface, allow to react with contaminant, remove heavy surface build up with scraper and if necessary apply a second treatment. Wash down with water after each application.

Non-absorbent Surfaces

Vehicles, machinery, plant, etc., brush surfaces thoroughly, agitating **ADOSOLVE** where possible before hosing down.

ADOSOLVE may be diluted with water or spirit before use.

For use on terrazzo dilute only with water.

Handling

When handling **ADOSOLVE** it is recommended that plastic gloves and eye protection is worn. If **ADOSOLVE** is to be sprayed ensure adequate ventilation. The wearing of a simple face mask will minimise the risk of inhalation of mists and vapours.

In case of accidental splashing wash the affected area with copious amounts of clean water.

Storage

No special storage required, the product has a shelf life of at least 12 months.

Health and Safety

ADOSOLVE is not considered flammable. However, contact with the eyes and skin should be avoided. Should any contact occur, rinse the affected area thoroughly with plenty of water.

Please refer to the separate **ADOSOLVE** Health and Safety Data Sheet.
